EMBO welcomes Lithuania as its newest member

Heidelberg, 13 June 2016 - EMBO is pleased to announce that Lithuania has joined its intergovernmental funding body, the European Molecular Biology Conference (EMBC). Lithuania is the 29th country to be accepted into the EMBC, where it has access to the support offered by EMBO to talented researchers in the life sciences at all stages of their careers.
Malta joins EMBC as a new Member State

Heidelberg, 21 March 2016 - EMBO is pleased to announce that Malta has joined its intergovernmental funding body, the European Molecular Biology Conference (EMBC). Malta is the 28th country to be accepted into the EMBC, where it can benefit from the support that EMBO offers to talented researchers in the life sciences at all stages of their careers.

India to become second EMBC Associate Member State

EMBO, EMBC and India sign cooperation agreement

New Delhi / Heidelberg, 5 February 2016 – The Government of the Republic of India, EMBO and its intergovernmental funding body, the European Molecular Biology Conference (EMBC), have signed a Cooperation Agreement to strengthen scientific interaction and collaborative research between India and Europe. After the signing of an agreement with Singapore in July 2015, India will now become the second country to acquire the status of EMBC Associate Member State.
Singapore and Europe forge deeper ties in the life sciences through milestone cooperation agreement

Singapore becomes the first non-European EMBC Associate Member State

Singapore / Heidelberg, 7 July 2015 – The Government of Singapore, the European Molecular Biology Organization (EMBO) and its intergovernmental funding body, the European Molecular Biology Conference (EMBC), have signed a Cooperation Agreement to strengthen scientific interaction and collaborative research between Singapore and Europe. This milestone agreement marks the first time a non-European nation has become an EMBC Associate Member State.

EMBO, EMBC and the National Science Council of Taiwan sign cooperation agreement

Heidelberg, 29 November 2012 – New ways of global scientific interaction have been created following a cooperation agreement between EMBO, its inter-governmental funding body, the European Molecular Biology Conference (EMBC), and the National Science Council of Taiwan (NSC). The agreement will allow Taiwanese scientists to participate in EMBO training programmes and activities. It also means that EMBO Courses & Workshops can take place at Taiwanese research institutes.

Scientists in Singapore and Europe to collaborate

EMBO, EMBC and Singapore sign cooperation agreement

Heidelberg, 13 October 2011 – Scientists in Singapore and Europe will have new avenues for scientific interaction, following a cooperation agreement between EMBO, its intergovernmental funding body, EMBC, and the government of Singapore. The agreement will allow Singapore scientists to participate in EMBO training programmes and activities. It also means that EMBO workshops and lectures can take place in Singapore. This is the first cooperation agreement of its kind between EMBO, EMBC and Singapore.

Ties between scientists in South Africa and Europe to strengthen

EMBO, EMBC and South African government sign agreement

Heidelberg, 22 September 2011 – Scientists in South Africa will access the latest in European life sciences thinking and research following a cooperation agreement between EMBO, its intergovernmental funding body, EMBC, and the government of South Africa. The agreement will allow South African scientists to participate in EMBO programmes and activities. It also means that certain EMBO activities will take place in South Africa.
South African scientists access European research via EMBC agreement

Heidelberg, 5 June 2008 – South African scientists will gain access to the latest thinking in molecular biology research through a cooperation agreement between the Government of the Republic of South Africa and EMBC. The agreement allows South African scientists to participate in EMBO programmes and activities. The agreement also provides for some EMBO activities to occur in South Africa. EMBO recognizes and fosters talented scientists, empowering them to advance the field of molecular biology. The cooperation agreement facilitates access for South African scientists to core EMBO programmes, such as EMBO Fellowships, EMBO Courses & Workshops and EMBO Young Investigator Programme.
